

## Glass Pebble Baubles

Make a plain Christmas bauble into something special with round glass pebbles. These pebbles are normally available in small bags at discount or craft stores. The string used to hang the baubles will need to be replaced with fishing line, as the pebbles make the bauble considerably heavier. Due to their weight, the baubles are not suitable for hanging on a Christmas Tree.

### You will need:

- Christmas baubles
- glass pebbles
- hot glue gun
- fishing line to hang

### Method

1. Apply hot glue around the base of the hanging clasp. This will create a stronger bond. Once the bauble is covered in pebbles it will be considerably heavier and require a stronger hanging mechanism.
2. Squeeze dots of hot glue onto the bauble and fix the pebbles to the glue. Start at the top of the bauble and work your way around and down.
3. Hold the pebbles on for a few seconds while the glue dries.
